SMART Board® 6065 interactive flat panel

Model SPNL-6065

Overview

The SMART Board® 6065 interactive flat panel features SMART's proprietary DVIT® (Digital Vision Touch) technology and combines a premium touch experience with the power of SMART Notebook® collaborative learning software on a 65" LED display. For simple and powerful digital whiteboarding, this interactive flat panel is also SMART kapp iQ™ enabled.

The 4K ultra-high-definition resolution display provides optimal image clarity and wide viewing angles. With the new Pen ID™ feature, you can assign different appearances to either pen and write or draw over any application in digital ink.

Object Awareness allows you to perform mouse functions with your finger, write in digital ink with the pen, and erase with your palm or eraser—all without switching tools or modes. You can use a variety of gestures in applications, and two users can write or draw at the same time.
