

SMART kapp iQ™

Powered by SMART Learning Suite

Amazingly simple. Pedagogically powerful.

Two display sizes:
55" or 65"

Naturally dynamic classes

SMART kapp iQ's whiteboard allows everyone to collaborate by inking back-and-forth between the display and any mobile device, making group work and teacher-led instruction more dynamic.

Key thoughts can be captured easily by simply taking screenshots and storing them for later. Rather than furiously scribbling notes, or lecturing rote from a presentation, lessons flow naturally.

Key features

Powered by SMART Learning Suite

SMART Learning Suite includes SMART Notebook® software, SMART amp™ software and SMART Lesson Activity Builder. Together, they connect students, teachers and devices to turn lessons into enriching learning experiences.

Walk Up and Use Simplicity

The display is ready when you are. Presence Detection ensures it powers on when you walk into the room. Simply connect your phone to get started.

From device to whiteboard and back again

Invite contribution from any participant in the session. They can ink onto the display from their device – laptop, tablet or phone. That contribution will simultaneously appear on all other devices in real-time.

The SMART kapp app

Connect one device (Android or iOS) to the display. Now you can share the session with up to 250 students, all of whom have the ability to follow and contribute to content as it unfolds in real-time, contribute in real-time and save it all for later.

Less Drain on IT

Simply mount the display on the wall or on a floor stand. That's it. Once it's mounted, just walk up and start using it.

Continue where you left off

Take saved notes from your SMART kapp whiteboard session and bring them up on the SMART kapp iQ interactive display. This way you can continue working on ideas, even if they began on a whiteboard.
